# KEY-MASTER

Choose security and convenience with KEY-MASTER - your partner in key management and security

## KEY MANAGEMENT SYSTEM

Welcome to the innovative key management systems from **KEY-MASTER**, designed to take the security and organisation of your keys to the next level. Our system provides a secure and efficient way to manage who has access to which keys, at what time. This makes it an ideal solution for sectors where security and control are critical, such as companies, hospitals and government institutions.

With **KEY-MASTER**, you can easily assign electronic access rights to authorised persons. Instead of physical keys, users can access via PIN code, finger scan, facial recognition or mobile applications, increasing security and simplifying management.

Our system accurately tracks the use of keys and provides real-time information on who accessed and when. This ensures complete transparency and makes resolving security incidents faster and easier.

Administrators can flexibly assign, modify or revoke access rights through the system, depending on changing needs within your organisation. In addition, the system provides the ability to receive notifications in case of suspicious activity, such as unauthorised access attempts. In this way, **KEY-MASTER** ensures optimum protection of your property and data.

# Junior

## KEY-MASTER

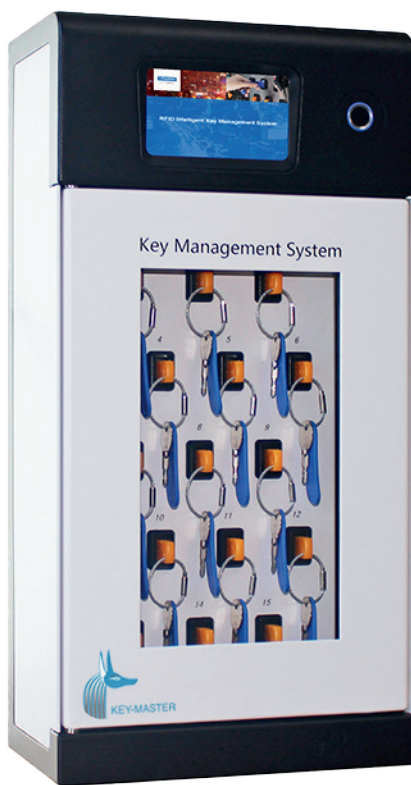

*Pushing the limits for your security*

**Junior** series of **KEY-MASTER** is specially designed to manage 15 to 26 keys. Thanks to the integrated Android terminal, lending and returning keys is easy and efficient. With the **KEY-MASTER Cloud Software**, you can manage the Junior remotely, no matter where you are. Moreover, you can also control the system via the Android smartphone app.

The Android control terminal, equipped with a 7-inch touchscreen, communicates via TCP/IP. This network offers the possibility of connecting an unlimited number of terminals.

**KEY-MASTER** is the market leader in intelligent key management systems. Through our close cooperation with customers and continuous optimisation of products and solutions, we guarantee reliable identification and security of persons, keys and valuable assets.

# Junior

## General specifications:

- Capacity: 18 key positions
- Operating terminal: 7" touchscreen Android with full colour display
- Function mode: Stand-alone or in a Cloud environment
- Authentication: PIN code, RFID reader, fingerprint
- Log files of data
- Notification e-mails
- Auditory and visual alarms

## Technological features:

- Emergency release: Equipped with emergency key for situations where immediate access is required
- Back-up battery: Ensures uninterrupted operation in case of power failure (optional)
- User-friendly web-based software solution for key management
- Support for multi-authentication
- Reliable anti-tampering contact for enhanced security
- Includes 2-year warranty
- Limited software licence fee

## Design and dimensions:

- Material: Metal casing
- Door: PMMA glass and stainless steel
- Colour: Silver / black
- Dimensions: 500x250x150mm HxWxD
- Weight: 13kg

# Junior S

## General specifications:

- Capacity: 20 key positions
- Operating terminal: 7" touchscreen Android with full colour display
- Function mode: Stand-alone or in a Cloud environment
- Authentication: PIN code, RFID reader, fingerprint, facial recognition
- Log files of data
- Notification e-mails
- Auditory and visual alarms

## Technological features:

- Emergency release: Equipped with emergency key for situations where immediate access is required
- Back-up battery: Ensures uninterrupted operation in case of power failure (optional)
- User-friendly web-based software solution for key management
- Support for multi-authentication
- Reliable anti-tampering contact for enhanced security
- Includes 2-year warranty
- Limited software licence fee

## Design and dimensions:

- Material: ABS housing
- Door: PMMA glass and stainless steel
- Colour: Dark grey
- Dimensions: 385x455x163mm HxWxD
- Weight: 13kg

# Junior+

## General specifications:

- Capacity: 26 key positions
- Operating terminal: 7" touchscreen Android with full colour display
- Function mode: Stand-alone or in a Cloud environment
- Authentication: PIN code, RFID reader, fingerprint, facial recognition

- Material: ABS housing
- Door: PMMA glass and stainless steel
- Colour: White
- Dimensions: 380x566x177mm HxWxD
- Weight: 17kg

# Junior+14

## General specifications:

- Capacity: 14 key positions, each securely stored in a separate compartment
- Operating terminal: 7" touchscreen Android with full colour display
- Function mode: Stand-alone or in a Cloud environment
- Authentication: PIN code, RFID reader, fingerprint, facial recognition
- Log files of data
- Notification e-mails
- Auditory and visual alarms

## Technological features:

- Emergency release: Equipped with emergency key for situations where immediate access is required
- Back-up battery: Ensures uninterrupted operation in case of power failure (optional)
- User-friendly web-based software solution for key management
- Support for multi-authentication
- Reliable anti-tampering contact for enhanced security
- Includes 2-year warranty
- Limited software licence fee

## Design and dimensions:

- Material: 1.5 mm steel, powder-coated
- Door: PMMA glass and stainless steel
- Colour: Black
- Dimensions: 520x720x169mm HxWxD
- Weight: 30kg

**KEY-MASTER**  
*Pushing the limits for your security*

# Pro Line

**Pro Line** series from **KEY-MASTER** offers industrial standard key cabinet products, designed to meet the needs of industrial users. The number of keys can be easily adjusted by activating different key lock sets. For additional capacity, a floor cabinet can be chosen, increasing the number of keys in one cabinet to 200.

Android operating terminal, equipped with a 7" touchscreen, uses TCP/IP communication. This allows an unlimited number of operating terminals to be connected to the network.

**KEY-MASTER** is known as the leading brand in intelligent key management systems. Through close cooperation with our customers and continuous product improvements, we can ensure accurate identification and security of people, keys and assets.

Our key management system features a built-in Android screen and can be linked to the **KEY-MASTER Cloud Software**. This makes key management even easier, with registration of key issuance or return stored on internal memory or on the cloud server. Only authorised users can access keys via RFID reader, password, cloud or fingerprint.

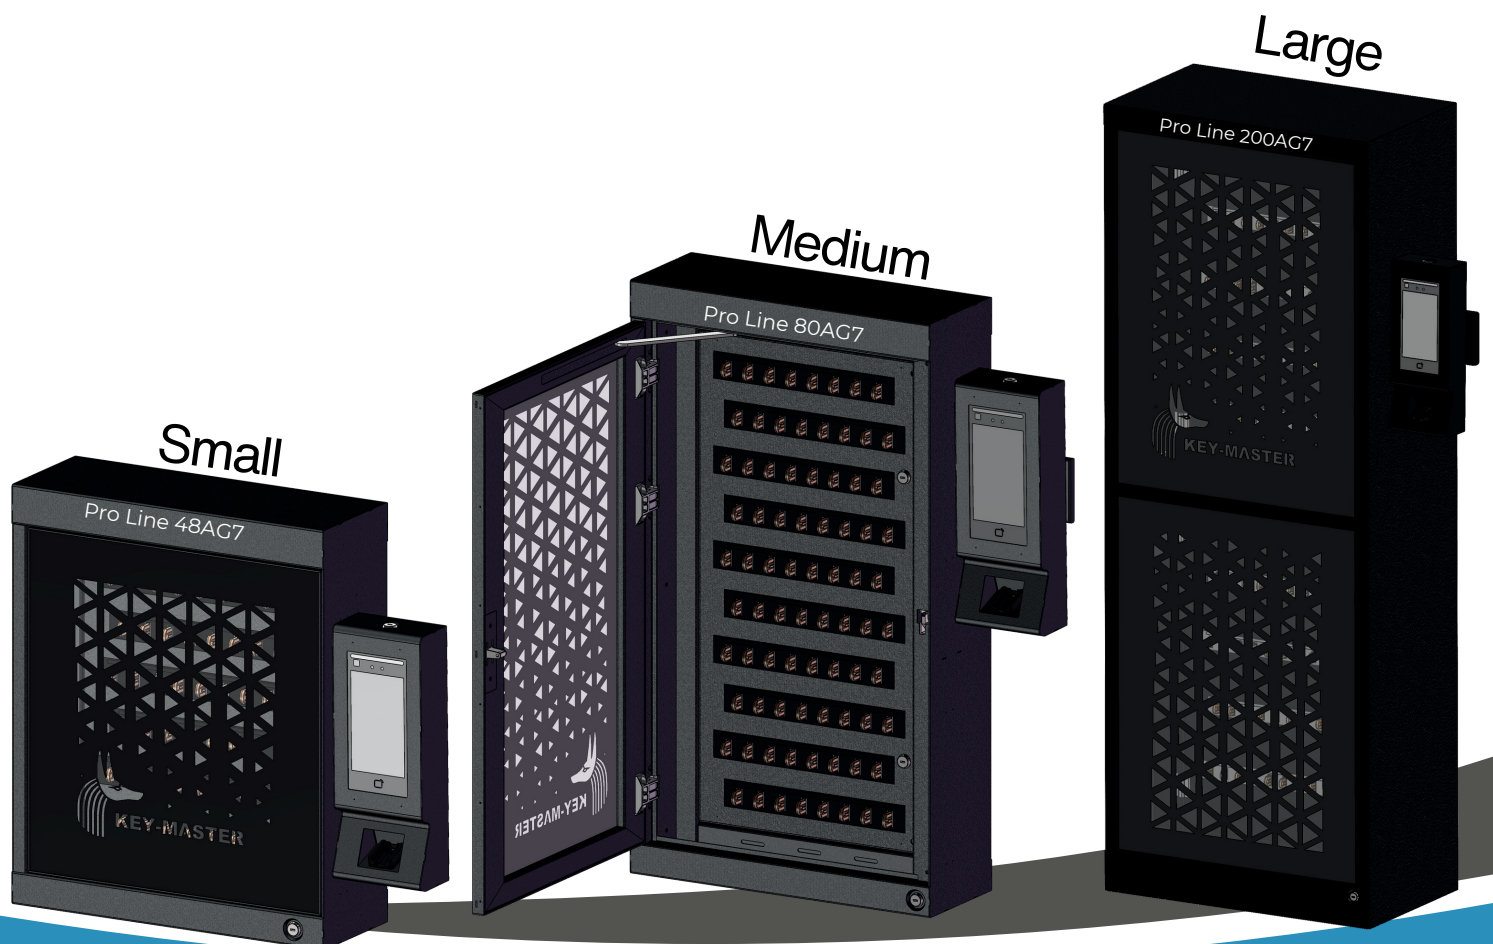

**KEY-MASTER** allows you to maintain an overview of all your keys at any time, recording data every time a key is added to or removed from the system.

# Pro Line AG

**KEY-MASTER Pro Line AG** series offers an advanced and secure solution for managing up to **200 keys**. Thanks to various access options, cloud functionality and emergency features, this system is suitable for both standalone use and integration into a cloud environment. The intuitive operating terminal, available with a 7" Android touchscreen, makes the **Pro Line AG** series ideal for a variety of applications where secure and efficient key management is crucial.

**Small:** 24 - 48 keys in key strips of 8 positions

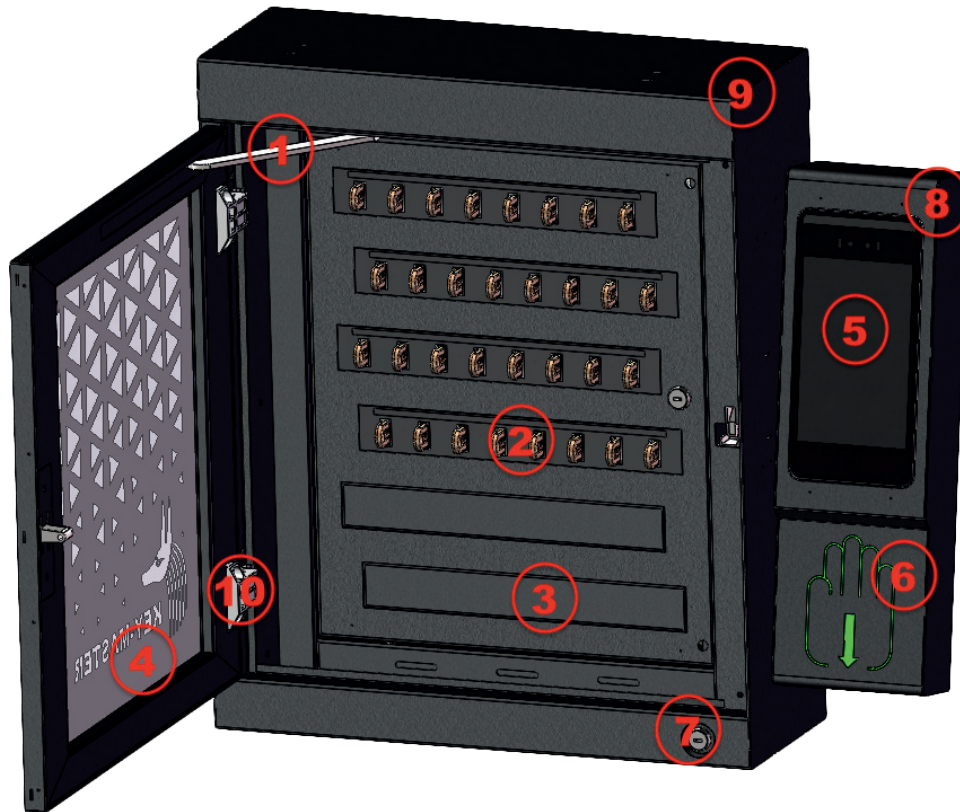

Dimensions: W530 x H640 x D190mm

**Medium:** 56 - 80 keys in key strip of 8 positions

Dimensions: W530 x H940 x D190mm

**Large:** 100 - 200 keys in key strip of 10 positions

Dimensions: W710 x H1820 x D400mm

- ① Door opens/closes automatically via automatic door opener
- ② Removable key-lock strips
- ③ Cover plate
- ④ Edge-filling glass panel, tempered and laminated glass
- ⑤ Android 7' touch screen with advanced face recognition
- ⑥ Vein scan or palm reader
- ⑦ Emergency opening lock
- ⑧ Operating terminal left, right or wall-mounted and rotatable
- ⑨ Tight corners, powder-coated in black
- ⑩ Sturdy hinges

# Pro Line 18

## General specifications:

- Capacity: 18 key positions
- Operating terminal: Android touchscreen with full colour 7-inch display
- Function mode: Stand-alone or in a Cloud environment
- Authentication: PIN code, RFID reader, fingerprint, facial recognition
- Log files of data
- Notification e-mails
- Auditory and visual alarms

## Technological features:

- Emergency release: Equipped with emergency key for situations where immediate access is required
- Back-up battery: Ensures uninterrupted operation in case of power failure (optional)
- User-friendly web-based software solution for key management
- Support for multi-authentication
- Reliable anti-tampering contact for enhanced security

## Design and dimensions:

- Material: 1.5 mm steel, powder-coated
- Door: Steel door
- Colour: Silver
- Dimensions: 400 x 500 x 180mm HxWxD
- Weight: 17kg

# Pro Line +21

## General specifications:

- Capacity: 21 keys, each securely stored in a separate compartment
- Operating terminal: 7" touchscreen Android with vivid colour display
- Function mode: Can be used stand-alone, or integrated into a cloud environment
- Authentication: PIN code, RFID reader, vain scanner, and facial recognition (AI)
- Communication: TCP/Wifi for seamless connectivity

## Technology features:

- Emergency unlocking: Features emergency key for situations where immediate access is required
- Back-up battery: Ensures uninterrupted operation in case of power failure (in option)

## Design and dimensions:

- Material: Made of 1.5 mm thick steel with a durable powder coating
- Door: Separate compartments by key lock
- Colour: Black
- Dimensions: 760 x 750 x 210mm HxWxD
- Weight: 60kg

# Pro Loc

**KEY-MASTER**

*Pushing the limits for your security*

Locker Systems **Pro Loc** from **KEY-MASTER** your solution for managing, securing and tracking portable assets.

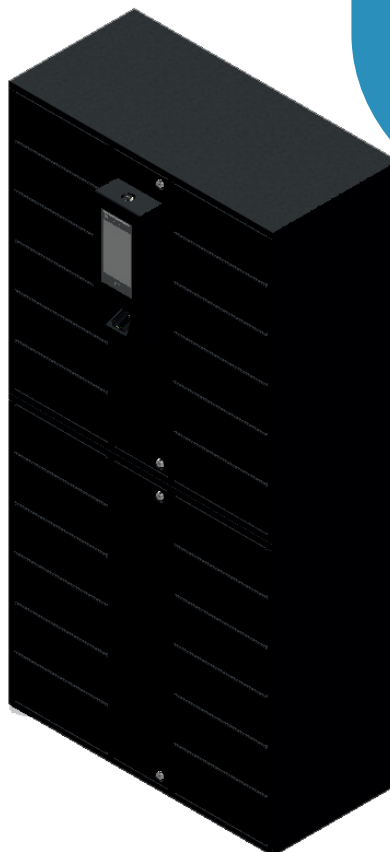

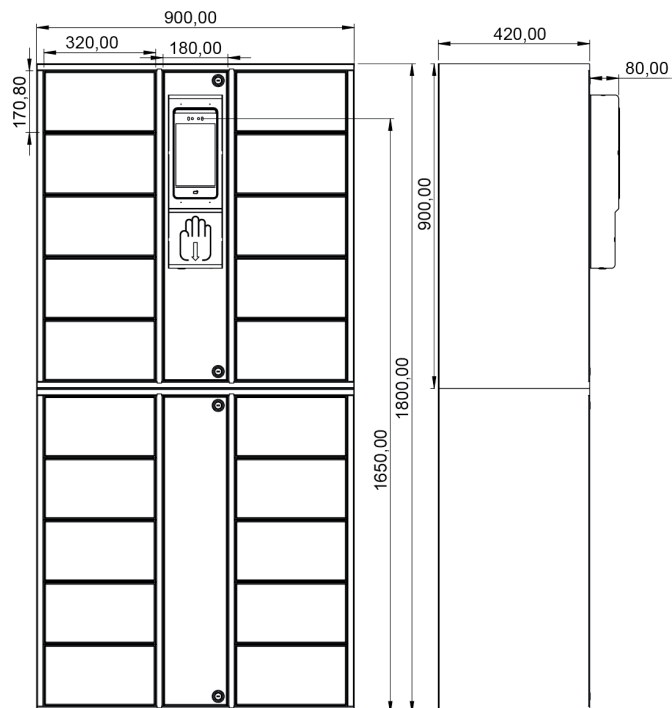

In a business environment where mobility of laptops, tablets, radios, test equipment and other critical assets is vital, it is essential to have a reliable system that allows you to accurately track where each item is.

**KEY-MASTER Pro Loc G** series offers exactly what you need: smart locker solutions with comprehensive access control, such as RFID, vein scan, PIN code, face recognition and remote opening via cloud software. Our digital storage lockers offer comprehensive management capabilities, including:

- Secure storage of portable company property in digital lockers.
- Setting permissions for digital storage lockers, allowing only authorised individuals to access important company assets.
- Controlling the carrying of only those items that employees are authorised to carry.
- Keeping track of the location of your possessions, who owns them and / or and when they have been returned to the designated lockers.
- Charging options via mains, USB and USBC.
- Detailed documentation of all authorisations, retrievals and returns.

**KEY-MASTER** smart locker solutions provide full control over your company's shared assets and support you in enforcing accountability by providing detailed reports on the status of each item upon return. With our smart lockers, you can make your assets available to those who need them, when they are needed.

# Integra PAXTON

The **KEY-MASTER Integra Paxton** key cabinet has been developed to simplify key management and improve security, in combination with the **Paxton** platform. Each key is located in a separate compartment, allowing any user with access rights to borrow one of the keys.

Two versions are available:

- **KEY-MASTER Integra 5 Paxton:** Users can borrow keys from the 5 available positions without recording which key was taken.
- **KEY-MASTER Integra with IO:** This version records which key has been borrowed and when it has been returned, allowing full insight into key management.

Cabinet management is easy thanks to seamless integration with the **Paxton Net2** access control software, which allows management of users and their access rights.

The **KEY-MASTER Integra 4+ Paxton** allows users to see not only the key position used in the **Paxton Net2** software, but also accurately records the times of issue and return.

In addition, the cabinet is equipped with an emergency side release, which can be manually operated with an emergency key.

**KEY-MASTER**  
*Pushing the limits for your security*

# Smart Office

**Smart Office** series from **KEY-MASTER** is an advanced item management system designed specifically for office environments. This innovative solution enables individuals and teams to use company assets quickly and efficiently. Each Smart Locker is equipped with drawers of different sizes, designed to store various items. The modular structure of the drawers allows the locker to be easily adapted to specific needs, creating a flexible design.

The series includes modules suitable for safe storage of keys, stamps, documents, tools, electronics and common office supplies. Thanks to integration with a cloud platform, management of these assets can be standardised, shared and centralised 24 hours a day, ensuring seamless access and optimal use of company resources.
